Stud Dog Supplements

Glucosamine: About 800mg for every 30lbs

Vitamin E: 500 IU for every 50lbs

A “Good” source of Omega 3's:

- 30 – 60lb dogs should get about **360mg DHA type Omega** and **540mg of EPA Type Omega** daily
- 60 – 90lb dogs should get about **720mg DHA type Omega** and **1080mg EPA type Omega** daily
- 90lb+ dogs should get about **1080mg DHA type Omega** and **1620 EPA type Omega** daily

“Motility Plus” from Platinum Performance: Follow label instructions for dosage.

“Ima Stud” from Nature's Farmacy: Follow label instructions for dosage.

These supplements are thought to “help” sperm. However, these can help overall with general health of joints, etc. You *must* get these supplements from a source you can trust. We use Nordic Naturals in our practice due to their stringent testing and bioavailability.

You can still use vitamins in addition to the above supplements. Check your current vitamins as they may already contain the above supplements at the doses recommended.
